

## **Projeto Integrar**

£6,912.51

**Works to build positive relationships between street children and their families as a first step towards reintegration into the family home.**

The Funding Network grant enabled Projeto Integrar to locate and visit the families of children living in the Casa Taiguara Children's Shelter and offer psychological consultation to families. The grant also went towards the production and execution of a video documentary about families whose children have been, or still are, street children. The money spent on the documentary was used to cover the costs of transportation, feeding, parking, equipment (rent of camera and lighting, tapes, etc.), payment of the professional team (script writer, cameraman, director, lighting, transcription and editing). The finishing of the documentary itself is due in December 2007. Part of the TFN Grant is being reserved for the distribution and promotion of the video.
